

Vu Tran

Senior Full Stack Software Engineer | Enterprise Java Architect | AI-Aware Builder

Ann Arbor, MI | 734 353 2648 | vtran20@gmail.com

About Me: <https://vtran20.github.io/> | GitHub: <https://github.com/vtran20> | LinkedIn: <https://www.linkedin.com/in/vuktx/>

Summary

Senior software engineer building production software since **2002**, with deep experience in Java, full-stack web development, enterprise systems, data integration, and eCommerce platforms. Strong fit for full-stack teams that need reliable software components, practical architecture, clear communication, and hands-on delivery across requirements, design, coding, tuning, testing, documentation, deployment, and support.

Strengths Relevant To KLA

- **Full-stack delivery:** Java/Spring Boot backends, REST APIs, SQL, JavaScript/TypeScript, React/Next.js, HTML/CSS.
- **Reliable software design:** object-oriented design, J2EE architecture, maintainable components, integration-heavy systems.
- **Data and storage:** SQL, PL/SQL, data integration, data migration, data mapping, JSON/XML, analytics-oriented workflows.
- **Production mindset:** Linux, Tomcat, Apache, Docker, CI/CD, build/release ownership, troubleshooting, and support.
- **Collaboration:** Agile delivery, onshore/offshore teams, US client communication, technical leadership, and documentation.
- **AI and automation:** recent focus on AI-assisted development, RAG, prompt engineering, context engineering, and workflow automation.

Technical Skills

Languages	Java, Python, TypeScript, JavaScript/jQuery, SQL, PL/SQL, HTML/CSS
Backend	Spring Boot, Spring, J2EE, Hibernate, REST APIs, Microservices, JSP/Servlets, JSON, XML
Frontend	React, Next.js, Redux, Tailwind CSS, responsive web UI
Data / Integration	SQL databases, data mapping, data migration, SAP integration, payment integration, Solr, Lucene
DevOps / Tools	Git, GitHub, Docker, CI/CD, Linux/Ubuntu, Apache, Tomcat, AWS

Experience Highlights

- Built and supported enterprise Java applications and full-stack web systems for retail, eCommerce, and integration-heavy environments.
- Designed multi-tenant systems and backend services where reliability, maintainability, and operational clarity mattered.
- Delivered customer-facing software involving search, checkout, payment, SAP integration, REST APIs, and database-backed workflows.
- Worked with distributed Agile teams across onshore/offshore models, translating business needs into practical technical designs.
- Owned build/release and production-support responsibilities in Linux, Apache, Tomcat, Docker, and CI/CD environments.

Selected Personal Projects

- **cuoi5s** - Multi-tenant eCommerce boilerplate.
- **image-server** - Image upload and dynamic transformation service.
- **finance** - Spring Boot finance/trading workflow app.
- **GarageStorage** - Local-first Expo app for garage inventory.
- **nailsPOS / NailsManagementSystem** - Nail salon POS and operations platform.

Education

Ho Chi Minh City University of Technology
