EDUCATION

- Ho Chi Minh City University of Technology

CORE SKILLS

- Java / Spring Boot
- Full-stack web apps
- REST APIs / SQL
- React / TypeScript
- Docker / CI/CD
- Linux / Tomcat / Apache
- Data integration
- AI-assisted development
- RAG / prompt engineering

FOCUS

- Simple architecture
- eCommerce platforms
- Multi-tenant systems
- Automation mindset
- Global delivery
- Production support

VU TRAN

Senior Full Stack Software Engineer | Enterprise Java Architect | AI-Aware Builder

PROFESSIONAL SUMMARY

Senior software engineer building production software since **2002**, with deep experience in Java, full-stack web development, enterprise systems, eCommerce platforms, integrations, and production operations. I like software that is simple, easy to understand, easy to test, and easy to maintain.

PROFESSIONAL STRENGTHS

- **Enterprise engineering:** Java, Spring Boot, J2EE, REST APIs, integration-heavy systems, and production support.
- **Full-stack delivery:** React, Next.js, TypeScript, JavaScript/jQuery, HTML/CSS, SQL-backed workflows.
- **Business systems:** eCommerce, retail, multi-tenant architecture, search, checkout, payment, SAP integration.
- **Delivery leadership:** Agile teams, onshore/offshore collaboration, US client communication, build/release ownership.
- **Automation mindset:** simplify repeated work with scripts, tools, AI assistants, RAG, and context engineering.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript/jQuery, SQL, PL/SQL, HTML/CSS

Backend: Spring Boot, Spring, J2EE, Hibernate, REST APIs, Microservices, JSP/Servlets, JSON, XML

Frontend: React, Next.js, Redux, Tailwind CSS, responsive web UI

Data / Integration: SQL databases, data mapping, data migration, SAP integration, payment integration, Solr, Lucene

DevOps / Tools: Git, GitHub, Docker, CI/CD, Linux/Ubuntu, Apache, Tomcat, AWS

EXPERIENCE HIGHLIGHTS

- Built and modernized enterprise Java applications, full-stack web systems, and integration-heavy business platforms.
- Designed multi-tenant and eCommerce systems with attention to scalability, maintainability, search, checkout, and payment workflows.
- Led technical delivery across onshore/offshore teams with clear communication, documentation, and release discipline.
- Supported production systems and build/release processes across Linux, Apache, Tomcat, Docker, CI/CD, and AWS environments.
- Recently focused on AI-assisted engineering, RAG, prompt/context engineering, and automation to reduce repetitive work.

SELECTED PERSONAL PROJECTS

- **cuoi5s** - Multi-tenant eCommerce boilerplate.
- **image-server** - Image upload and dynamic transformation service.
- **finance** - Spring Boot finance/trading workflow app.
- **GarageStorage** - Local-first Expo app for garage inventory.
- **nailsPOS / NailsManagementSystem** - Nail salon POS and operations platform.
